

Welcome to Thermal-Lube

For over 30 years, Thermal-Lube continues to innovate and help our clients increase productivity and reliability, conform to environmental mandates and reduce operating expenses, by providing application specific synthetic lubricant formulation, increasing lubricant life and changeover cycle times and offering custom blended biodegradable lubricants. Thermal-Lube's advanced analysis capabilities help our business clients by continuously optimizing their formulations based on their actual usage and providing readditization options.

Operating in an Environmentally Sensitive Area?

Need to protect ground and surface water from lubricant contamination to comply with local regulations? Thermal-Lube formulates biodegradable lubricants to fit your operating needs and can offer a validation service to certify if equipment and contractors are in compliance.
