

# THE THERMAL-LUBE

## BIODEGRADABLE AUTOMOTIVE UNDERCOATING

# XL9565

July 2024

### DESCRIPTION:

**XL9565** is an environmentally friendly, readily biodegradable and economical anti-rust coating, specifically designed to provide superior protection for vehicles and equipment exposed to commonly used de-icing compounds.

**XL9565** is formulated with biodegradable oil enriched with anti-corrosion ingredients that provide excellent protection against salt and moisture that attack your vehicle.

**XL9565** has a low viscosity and excellent characteristics that allows it to penetrate the tiniest places of the metal, for complete and durable protection.

**XL9565** forms a protective film with excellent adhesion to metal surfaces that will withstand high humidity and exposure to corrosion by saline spraying.

### APPLICATIONS:

- Ideal for vehicles, marine equipment and forklifts
- Ferrous and non-ferrous metal parts
- Excellent for any equipment or parts that require rust protection

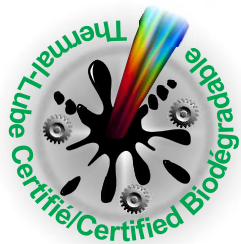

### BENEFITS:

- Biodegradable formula
- Excellent adhesion to metal
- Penetrates into folds, nooks and crannies, cracks and hard-to-reach surfaces
- Excellent stability in the face of temperature differences can therefore be applied at any time and in any season, for the same efficiency
- Protect even underwater
- Exceptional protection against salt
- Provide a clean appearance since they are transparent

### BIODEGRADABILITY AND TOXICITY:

- OECD 301B >60% Readily Biodegradable
- Relatively non-toxic

| TYPICAL SPECIFICATIONS     |                       |
|----------------------------|-----------------------|
| Product Code: XL9565       | Description           |
| Texture                    | Tacky                 |
| Colour                     | Light Brown           |
| Odor                       | Pleasurable fragrance |
| Viscosity @40°C, cSt       | 35                    |
| Density (g/ml)             | 0.87                  |
| Salt Mist Test Performance | >500 hours            |
